

REFINISHING CARE & MAINTENANCE SHEET

Please Read Carefully

Congratulations on the purchase of your Restored Surface! You have selected the most durable refinishing system available today. The following instructions have been compiled so that you may have many years of enjoyable use and trouble-free maintenance. Please **DO NOT** use this surface for 36 to 48 hours (at room temperature). Although the refinished surface can be put back into full use after this time, the surface will actually require up to 30 days to completely cure. Please observe the following:

General Cleaning Instructions:

For normal everyday cleaning, we suggest the use of mild soap and water with a soft wash cloth. Do not use scouring pads or abrasive cleaners as they will dull the surface. Should you wish to use a product not listed below, test on small area in a corner before applying to the entire surface. Always review individual cleaner's instructions. **Always rinse thoroughly after cleaning.** PLEASE NOTE: All newly refinished surfaces will have some surface dust which will have settled into the new surface. Do not be alarmed; because the surface is still within its long-term cure period, normal use and regular cleaning will remove all minor surface dust marks.

Recommended Cleaners:

Formula 409	Glass Plus	Scrub Free
Diluted Pine Sol	Simple Green	Bathroom Duck
Mr. Clean	Bon Ami	Diluted Spic & Span
Dish Washing Soaps (Dawn, Joy, Ivory, etc.)		

There is no need to use abrasive cleaners, as they will dull the gloss over a period of years. In extreme cases where the recommended cleaners do not work, use mild abrasive cleaners such as Soft Scrub or Liquid Comet.

***Do Not Use:**

Dow Disinfectant Cleaners	Steel Wool / Wire Brushes	Dyes or Inks
Lysol Disinfectant Cleaner	Aerosol Cleaners Tough Act	Acetone
Ammonia/cleaners containing ammonia	Fingernail Polish Remover	Lestoil
Mats with suction cups and adhesives	Harsh Abrasives	Bleach

Use of these chemicals will cause a dull surface and/or an easily recognizable chemical crack. This will void your product warranty.

Drain Cleaners:

Caution: Liquid drain cleaners are recommended over powders and/or crystal. However, when using liquid drain cleaning agents, bail the standing water out of the bathtub and remove the drain plug. Use a funnel to prevent spills and apply the chemicals directly down the drain. Always make sure that chemicals do not come in contact with the new surface. Use drain cleaners sparingly so that they do not boil out and attack the new surface.

Please Note

1. When using a wax to clean and restore a refinished finish that has been poorly maintained, wax will generally leave a slick surface. We have found that Mirror Glaze # 17 does not appear to create as slick a surface. Mirror Glaze # 17 is generally available at a local automotive store.
2. Do not lay soap, bottles or any other objects on the finished surface.
3. Be sure that your faucets are dry and not dripping after using the fixture.
4. Do not drop sharp or heavy objects on the finish, which may cause it to chip. Contact Pacific Bath Refinishing immediately for repairs if this should occur. Failure to contact Pacific Bath in a timely manner can result in further damage and will void the warranty.
5. Faucets must be properly maintained by the owner and user to protect the new surface. Leaky faucets will erode the new finish, causing it to crack and wear out prematurely, and voiding the warranty. **Do not** allow water to remain on the refinished surface for extended periods of time, i.e., for a one week period.
6. Destruction of the finish may occur through improper use of acid-bearing compounds, such as drain openers or tile grout cleaners. All chemicals must be kept away from the finish. The chemicals include, but are not limited to, cosmetics, hair dyes, and perfumes, which may stain or otherwise mar the finish. Introduction of any of these chemicals onto the finish would be considered neglect and void the warranty.
7. Do not use a rubber bath mat. Most mats will produce a reaction with the new surface when subjected to hot water. Pacific Bath Refinishing carries slip-resistant mats and surfaces which will give years of trouble-free service. These mats are warranted; ask Pacific Bath Refinishing for details.
8. Do not place hot pots or pans directly on kitchen counter surface and do not cut on kitchen counters. Either will void the warranty.

Refinishing Special Instructions

1. Do not use surface for a minimum of 36–48 hours after refinishing.
2. Do not place any heavy objects on refinished surface for three days.
3. Do not allow water to remain on the refinished surface for extended periods of time.
4. Pacific Bath Refinishing does not warranty against damage caused by neglect or abuse from sharp or heavy objects.
5. Pacific Bath Refinishing does not warranty rust repairs.
